

A screenshot of a web browser window. The address bar shows a local file path. The browser's content area is entirely red, which is the result of the CSS code in the HTML file. The code is as follows:

```
1 <HTML>
2   <Head>
3     <style>
4   BODY {background-color:red;}
5   </style>
6 </head>
7 </BODY>
8 </HTML>
9
```
